### SECTION 4. FIRST AID MEASURES

**If inhaled:**  
Remove patient from exposure.  
Obtain medical attention.

**In case of skin contact:**  
Remove contaminated clothing.  
Wash skin immediately with water.  
Obtain medical attention.

**In case of eye contact:**  
Immediately irrigate with eyewash solution or clean water, holding the eyelids apart, for at least 10 minutes.  
OBTAIN IMMEDIATE MEDICAL ATTENTION.  
Continue irrigation until medical attention can be obtained.

**If swallowed:**  
Wash out mouth with water.  
Do NOT induce vomiting as a First-Aid measure.  
Obtain medical attention.

**Most important symptoms and effects, both acute and delayed:**  
Refer to sections 2 and 11  
Causes serious eye damage.

**Notes to physician:**  
Symptomatic treatment and supportive therapy as indicated.  
For further detail consult the prescribing information.

### SECTION 5. FIREFIGHTING MEASURES

**Suitable extinguishing media:**  
water spray, foam, dry powder or CO2.
Unsuitable extinguishing media: Avoid high pressure media which could cause the formation of a potentially explosible dust-air mixture.

Specific hazards during firefighting: If involved in a fire, it may burn and emit noxious and toxic fumes.

Special protective equipment for firefighters: A self contained breathing apparatus and suitable protective clothing should be worn in fire conditions. Prevent fire extinguishing water from contaminating surface water or the ground water system.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures: Avoid dispersal of dust in the air. Ensure suitable personal protection during removal of spillages. See Section 8.

Environmental precautions: Do not allow to enter drains, sewers or watercourses. Collect spillage.

Methods and materials for containment and cleaning up: Transfer spilled tablets to a suitable container for disposal. Wash the spillage area with water. Avoid release to the environment. See section 13.

SECTION 7. HANDLING AND STORAGE

Advice on safe handling: Avoid contact with skin and eyes. Wash hands after use. Minimize dust generation and accumulation. The product may form flammable dust clouds in air, if dust from crushed tablets is allowed to accumulate.

Conditions for safe storage: Keep container tightly closed.

Recommended storage temperature: < 30 °C

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

</tr>
</tbody>
</table>

Engineering measures: The specific controls will depend on local circumstances and should be based on the risk assessment. Appropriate controls to reduce exposure may include engineering controls, for example ventilation, procedural controls and the
use of personal protection equipment.

Prevent entry into drains, sewers or watercourses.
See Section 6 for environmental precautions.

Personal protective equipment

Respiratory protection: Use a negative pressure air purifying respirator (half face mask) with filter class P3 if the risk assessment does not support the selection of other protection.

Eye protection: Use goggles to protect against direct contact with the product if the risk assessment does not support the selection of other protection.

Skin and body protection: Use protective clothing to protect against direct contact with the product if the risk assessment does not support the selection of other protection. Use impervious protective gloves to protect against direct contact with the product. If the product is dissolved or wetted use a glove material that is resistant to the solvent/liquid.

Protective measures: Decisions about whether the use of personal protective equipment (PPE) is appropriate as part of the control strategy should be based on the workplace risk assessment and should take account of local legislative requirements for selection and use. There are multiple factors that will affect the specific requirements such as amount and concentration of the material, duration of exposure, frequency of exposure, external environmental conditions, the task, the user etc. All the information above should not be used in isolation and should be considered in the context of the workplace risk assessment on a case by case basis.

The recommended personal protective equipment (PPE) is based on preventing the potential adverse health effects from exposure to the active pharmaceutical ingredient (API). The risk of exposure to the API in the formulation/product needs to be taken into consideration.
