

Tax Transparency Code

AstraZeneca Australia Tax Contribution Report

For Year Ended 31 December 2021

Chief Financial Officer's Statement

I am pleased to present AstraZeneca Australia's (AZA) Tax Contribution Report for 2021.

In preparing this report we have followed the recommendations of the Board of Taxation's Tax Transparency Code, we support the adoption of this voluntary code as AZA has a strong commitment to compliance, governance and transparency.

AstraZeneca operates in the highly regulated global industry of manufacture and wholesaling of pharmaceuticals used for the treatment of Cardiovascular and Metabolic Diseases, Respiratory & Immunology and Oncology. AstraZeneca must ensure it enters into transactions in an ethical manner to maintain its reputation with regulators, governments, health care professions & patients.

To meet this objective and to make a positive difference to the lives of our patients and staff, AstraZeneca manages its global and local tax obligations in line with domestic and international laws and regulations which is consistent with its overall approach to risk management and compliance.

Signed

Introduction to AstraZeneca Australia

Established on 30 October 1957, AstraZeneca Australia (AZA) is a biopharmaceutical company engaged primarily in the manufacture, marketing, distribution and sale of prescription medicines in both domestic and export markets. .

AZA is a subsidiary of AstraZeneca plc a UK based global biopharmaceutical company employing 83,100 staff worldwide.

AZA has manufacturing facilities and head office located in Macquarie Park, New South Wales with sales and other staff based throughout the country.

AZA focuses on four main areas of healthcare: Cardiovascular and Metabolic Diseases (CVMD), Respiratory & Immunology, Oncology and vaccines and immune therapies.

AZA is the largest national manufacturer of pharmaceuticals, providing A\$703 million of medicines to the local market and approximately A\$114 million in exports mainly to China and Japan.

AZA also participates in the Group's R&D work and is currently involved in more than 40 clinical trials across Australia with the trials focusing on potential treatments for Cancer, Cardiovascular disease, Renal disease and Respiratory illnesses.

During the year, the distribution of vaccine will continue to occur globally and in Australia. The Group will continue monitoring the pandemic situation and continue to perform its obligations in relation to its vaccine contract with the Commonwealth of Australia.

AZA currently employs over 874 people who are dedicated to the manufacture, supply and distribution of medicines that aim to improve the health and wellbeing of Australians. We invest in our people to ensure we have a well-educated and well-trained workforce.

Overall contribution to the Australian Economy

AstraZeneca Australia (AZA) has been operating in Australia for more than 60 years. Since beginnings in a converted ex World War II army canteen in the Brisbane suburb of Rockdale, AZA has contributed to the Australian economy through its own operations and via other industries that supply the intermediate inputs including packaging used in AZA's manufacturing facility.

AZA has been manufacturing continuously since 1958, & manufacturing at Macquarie Park, North Ryde, Sydney, since 1970 after relocating from Brisbane.

Gains in patient wellbeing due to conditions treated by medicines developed by AstraZeneca also contribute in improved quality of life, reduced health system expenditure, increased workforce productivity and other financial benefits to society.

Tax Governance

AstraZeneca manages its global tax obligations strictly in compliance with domestic and international tax laws and regulations. This underpins AstraZeneca's global tax policy, the key principles of which are:

- AstraZeneca fully complies with the letter and spirit of the laws and regulations in the countries in which we operate
- AstraZeneca has established and is committed to maintaining compliance governance processes to ensure the integrity of tax returns, and timely and accurate tax payments in all the countries in which we operate
- AstraZeneca maintains professional and transparent relationships with tax authorities and ensures there is access to relevant information necessary to confirm the integrity of our tax processes, returns and payments.
- Government tax incentives are accessed only where appropriate and in line with substantial business activities and the intent of the Government policy.

These principles are consistent with AstraZeneca's broader approach to low risk tolerance in relation to taxation management and compliance. AstraZeneca maintains appropriate reporting lines to Senior Executive Officers and to the Group Audit Committee which ultimately reports to the AstraZeneca Plc Board.

ATO public disclosure – updated 2021

It is expected that the Commissioner of Taxation will publicly disclose the following details in respect of AZA's consolidated entity AstraZeneca Holdings Pty Ltd's income tax return for the year ended 31 December, 2021.

Name	AstraZeneca Holdings Pty Ltd
ABN	59066876962
Total income	\$1,085,127,894
Taxable/net income or (loss)	\$155,685,431
Income Tax Payable	\$40,390,847

Income Tax Expense

Total income reported in the income tax return represents gross income for accounting purposes – i.e. income before any expenses are taken into account. Total income is not an indicator of the real, economic or taxable profits of an organisation. Accounting profit is a better indicator, as it takes into account both income received and expenses incurred.

We provide following a summary of AZA's total income & accounting profit for the year ended 31 December 2021, followed by a reconciliation of AstraZeneca's accounting profit to tax paid for the year ended 31 December 2021, as reported in the income tax return. All material differences have been disclosed in this reconciliation. Effective tax rate (ETR) has been calculated based on the company tax expense divided by accounting profit.

The prior year is also included for comparison.

Net accounting add-back

There are differences between the recognition of income and expenses for accounting and tax purposes. AstraZeneca had a net accounting add-back which predominantly relates to the following:

1. Research and Development ("R&D") expenses: R&D expenses are added back before determining taxable income, as an equivalent amount is used in the calculation of the R&D tax offset (being the tax-effected amount shown above of A\$6,314,782.71).
2. Non-deductible business expenses: including certain legal fees which are capitalised for tax purposes, timing differences between tax and accounting in respect of depreciation and expenses accrued for accounting purposes (e.g. in respect of salary and wages, advanced payment) and permanent differences (e.g. certain entertainment expenses).

R&D tax offset

As AstraZeneca engages in and invests a significant amount in R&D, it is entitled to the R&D tax incentive. This Government endorsed tax offset seeks to encourage more companies to engage in R&D for the benefit of the Australian economy.

On taking into account the impact of the R&D Offset and the treatment of vaccine revenue, the effective tax rate (ETR) for AstraZeneca for the year ended 31 December 2021 is approximately 59%.
